Projects

Hour Projects

A challenge to create 10 JavaScript projects in 1 hour. It took me 2 hours.

- The projects are essential components to any modern website.
- Every project in it, the homepage included, has a nice looking UI.
- Got exposed to working under pressure.

https://hour-projects.netlify.app

Ninja Food

A website where you can look up recipes and save them in favorites.

- A website that looks good, is responsive and is styled using TailwindCSS.
- Used TheMealDB API to get the recipes.

Calculator

A simple JavaScript calculator

- Simple JavaScript calculator with a nice UI.
- Learnt more about and used JavaScript Classes.

Starbucks

The landing page for the Starbucks website

- Turned design to pixel perfect HTML/CSS website.
- The website is fully responsive.
